**Custom Skis**

Handmade with Swiss Precision

A dream comes true!

After three years in the making, a custom made ski from the Swiss Alps has arrived.

### **Core Skis**

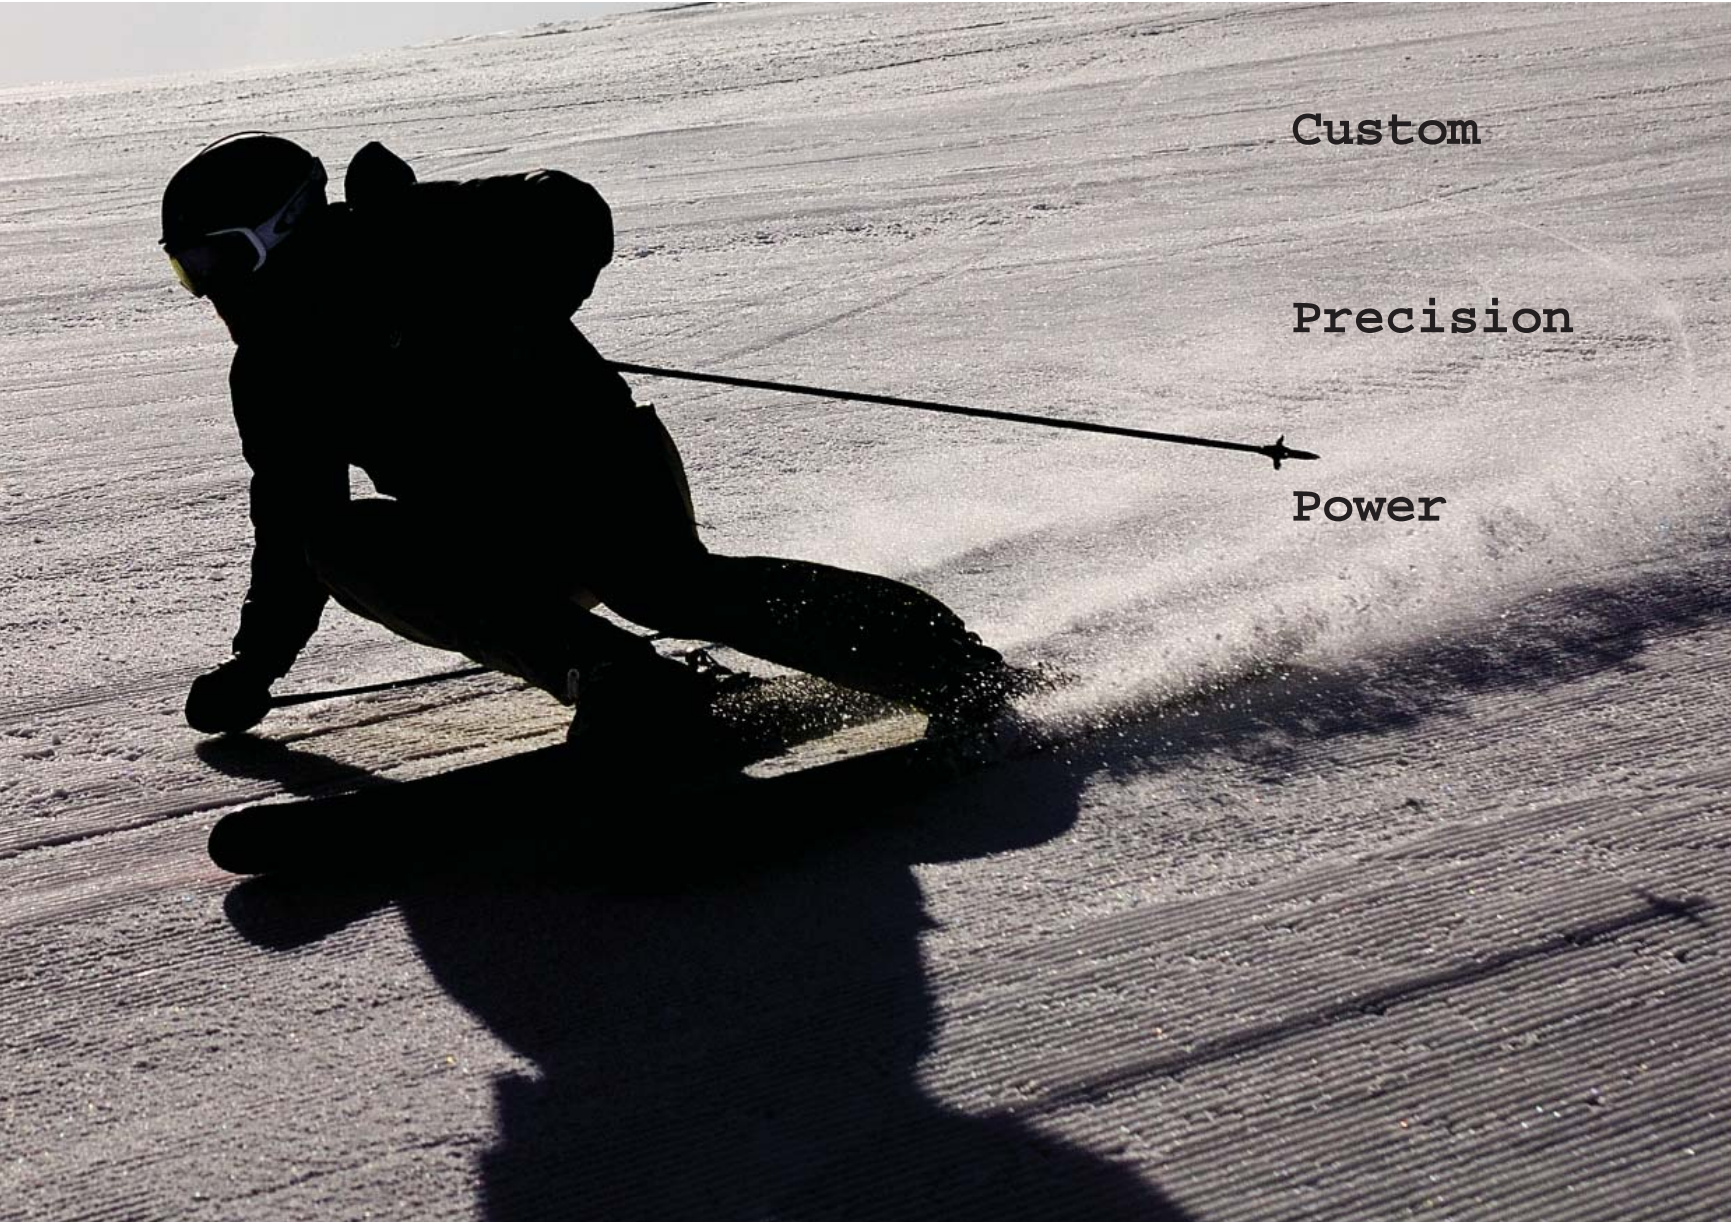

Core Skis embody top quality, custom made skis incorporating technological advancements, exclusivity, reflecting lifestyle and riding features without compromise. The distinctive feature of all Core Skis is the handmade quality and design precision.

- Custom made by experts for the hard core skier.
- Designed in Klosters, Switzerland and produced in northern Italy in a small factory where they are all milled by hand with the great passion and know-how gained from decades of experience in the Ski World Cup and success in the manufacturing of Swiss skis.
- For each single component of our skis, there is no compromise; only the best materials are used.
- All Core Skis are custom made using our proprietary technology.
- Less hyperbole, more technical know how.
- Sustainability is an essential part of the approach of the Core brand.
- Unlike many other ski manufacturers, Core Skis only make a limited range of tailor made skis.

Core Skis are quick to react to a skier's needs in a variety of mountain conditions.

The main feature of all Core Skis is their **superb riding experience**. Our customized product provides the most incredible running smoothness, responsiveness and the perfect stability, whether you are a skier who likes the chutes, the powder, the glades or the groomers. The “wobbling” or “planing” typical of conventional skis is reduced to the minimum.

For further information on our ski options, including models, customized colors, fabrications and finishes including personalizations, please visit our homepage [www.coreskisusa.com](http://www.coreskisusa.com), contact us by phone 347-325-1275, or e-mail [info@coreskisusa.com](mailto:info@coreskisusa.com).

Power

## Customized Construction Materials

There is a reason why high performance sports equipment (e.g. racing bikes, tennis rackets, golf clubs) and sports cars are constructed out of the most durable yet light weight materials. We think your skis should be constructed this way. You choose the model, the material, the finish, the color and the personalization for the ski.

# Fabrication Options: Polyamide, Titanium or Carbon

## Polyamide

A Lightweight Polymer Base with High Resilience

## Titanium

Durability and Torsion Strength

## Carbon

Vibration Absorption

Passion White

Powerslide

Titan

Powder Fats

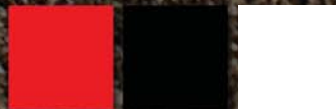

# Muscle Car

Radius: 16m (173cm)

Dimension: 112 / 65 / 97 mm

This **cross-carver** promises top performance on groomed slopes. From tight to wide turns, the Muscle Car offers smooth running and optimal grip - whatever your speed.

Polyamide

Titanium

Carbon

159 , 166 , 178 cm

# Powerslide

Radius: 14m (165cm)

Dimension: 112 / 65 / 97 mm

The **slalom ski** for skiers who like shorter radius aggressive turns, and demand responsiveness and maximum stability.

Polyamide

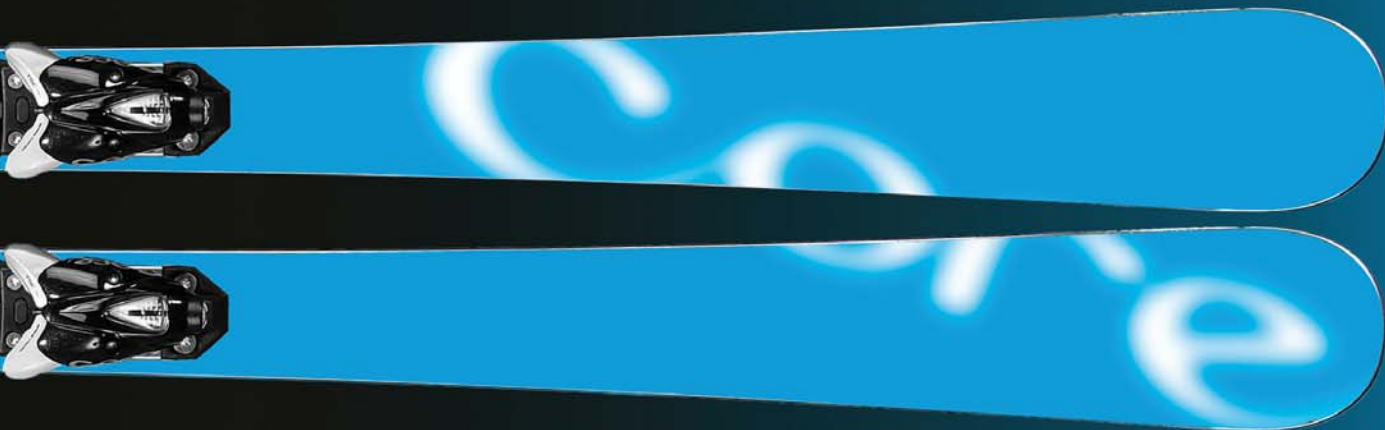

Carbon

158 , 165 cm

# Free

Radius: 18m (170cm)  
Dimension: 120 / 77 / 110 mm

Looking for unlimited action? A versatile **all-mountain ski** and a feel of absolute freedom on powder. It also has perfect carving characteristics for skiing on groomed slopes.

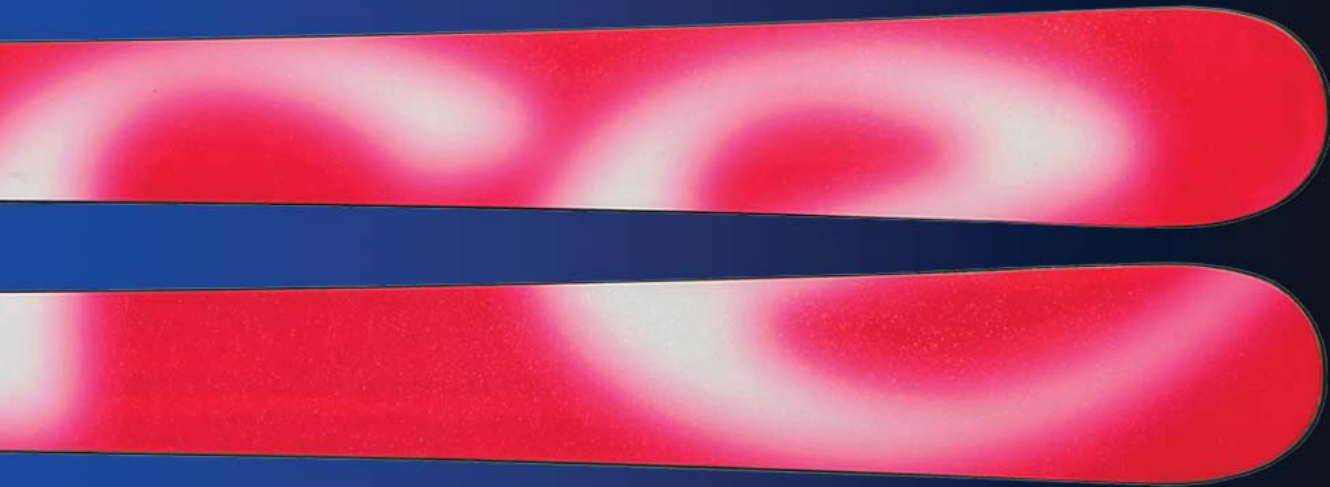

Polyamide

Carbon

160 , 170 , 180 cm

# BC Hard Core

Radius: 19m (167cm)

Dimension: 119 / 86 / 109 mm

For all round skiing predominantly "off-piste": **Backcountry**. Be it powder or in the packed snow; a jump here, a trick there or just enjoying cruising along... also ideal for touring or as a Telemark ski.

Polyamide

167 cm

BCHardcore | 175 cm

## Powder Fats (Wang Ost)

Radius: 30m (185cm)

"Powder Fats" is an exclusive handmade freeride ski with an ash wooden core and subtle tip and tail rocker, designed specifically for powder skiing. The soft tip and wider dimension provides floatation in deep powder and the tail offers excellent balance and stability.

Polyamide

185 cm: 145 / 120 / 135 mm

175 cm: 140 / 115 / 130 mm

165 cm: 135 / 110 / 125 mm

core

## Passion

Radius: 14m (166cm)

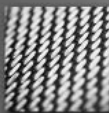

Dimension: 110 / 63 / 95 mm

A stunning ski design specifically for ladies, incorporating the characteristic of a **lady's slalom carver** with plenty of flexibility, easy-to-turn, excellent grip on hard slopes; yet runs smoothly and quickly. For tight turns and responsive skiing.

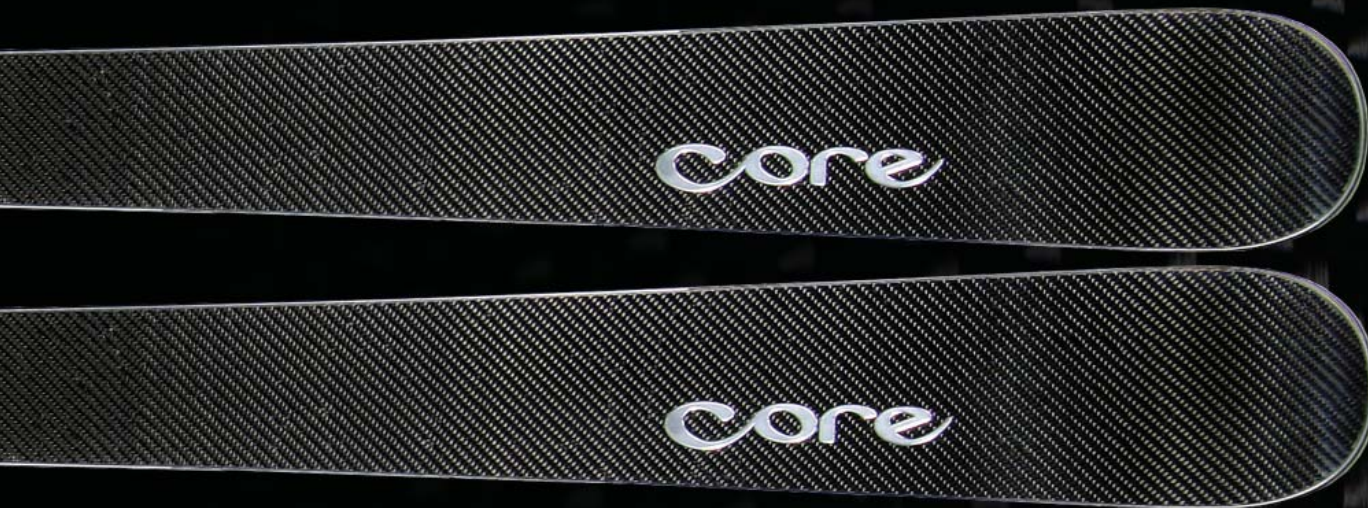

Polyamide

Carbon

152 , 158 , 166 cm

# Mr President

Radius: 21m (184cm)

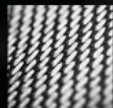

Dimension: 104 / 65 / 89 mm

The giant slalom ski for skiers who embrace downhill, demand precise edging, carve extended turns and demand maximum snow performance and stability even at top speed.

Polyamide

Carbon

173 , 178 , 184 cm

GUIDE

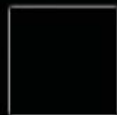

## Guide

Radius: 16m (173 cm )

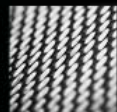

Dimensions: 125 / 98 / 114 mm

The skis that will satisfy those skiers seeking the "Big Mountain" experience. Twin tipped rocker with greater width under foot and a construction that will guarantee that you conquer the back bowls and off piste, yet performing on the groomers when you return.
